## Professional Summary

Experienced data scientist with strong expertise in developing advanced analytics solutions. Architected a Python-based decision support system for real-time market analysis, demonstrating proficiency in statistical modeling and data visualization. Leveraged technical skills in Python, SQL, and Excel to translate complex business challenges into actionable recommendations. Proven ability to apply data-driven methodologies to drive financial and operational insights.

## Core Expertise

- **Trading Systems:** Market Making, Algorithmic Execution, Liquidity Provision
- **Analytics:** Technical Analysis (CTA), Risk Management, Portfolio Optimization, Statistical Analysis
- **Programming:** Python (Pandas, NumPy, TensorFlow), API Integration, Google Sheets Automation, SQL
- **Tools:** Jira, Trello, Microsoft Excel, GitHub CLI, Data Visualization

## Professional Experience

### Sina Behgozin Brokerage

Oct 2018 - Present

*Financial Trader & Market Making Strategist*

*Tehran, Iran*

- Developed a Python-based decision support system for real-time market insights, integrating live order-book data and statistical modeling to guide advanced trading strategies.
- Integrated with the Tehran Stock Exchange API to analyze live market data, translating complex business questions into actionable data queries.
- Engineered LSTM neural models for forecasting price trends, demonstrating proficiency in Python and statistical analysis for predictive analytics.
- Automated trade reporting and reconciliation processes using Python and Excel, reducing manual interventions by 80% and enhancing data accuracy.
- Optimized liquidity provision across 15+ high-volume equities by implementing algorithmic strategies and advanced risk management protocols.
- Instituted VaR-based risk management frameworks to support quantitative decision making in volatile market conditions.
- Mentored junior traders on utilizing analytical tools and methods, emphasizing statistical analysis and actionable recommendation skills.

### Donya-e-Eqtasad (World Economy Newspaper)

Aug 2020 - May 2021

*Senior Technical Analyst*

- Authored over 200 technical analysis articles by leveraging data visualization tools such as Microsoft Excel, translating complex market trends into comprehensible insights.
- Tracked and analyzed market trends in diverse sectors, including automotive, petrochemical, and banking, to provide actionable recommendations for investors.
- Delivered data-driven support/resistance signals and strategic insights, applying structured analysis methods to address business challenges.

### Bedaan Inc

Dec 2015 - Jan 2023

*Project Manager*

- Managed end-to-end fintech projects from requirements gathering to deployment
- Coordinated cross-functional teams on financial-system implementations

## Education

### Alzahra University

2021

*MBA, Data Science & Algorithmic Trading*

### Mazandaran University of Sci. & Tech.

2007

*B.Sc., Industrial Engineering*

## Key Projects & Repositories

---

### Market Maker Decision Support System

- Python-driven trading infrastructure for market making
- Real-time liquidity analytics & spread monitoring
- Automated reconciliation & reporting workflows
- Predictive alerts for volatility spikes & market anomalies

### MarketMakerReporter

- Automated market-making performance reporting tool
- (GitHub repository: Shakour-Data/MarketMakerReporter)

### Project Management CLI & Workflows

- Custom scripts for GitHub CLI, branching & CI/CD
- (GitHub repository: Shakour-Data/ProjectManagement)

### GravityWaves

- Machine-learning stock-forecasting platform
- (GitHub repository: Shakour-Data/GravityWaves)
